- Button Event Handling and Toast

Today's Lecture

Put the following code in a composable (for example in setContent):

```
val currentContext = LocalContext.current
```

Set function to run for onClick event

{ } defines the event handler method body

Call show on toast

```
Button(onClick = { Toast.makeText(currentContext, "Hello Kotlin", Toast.LENGTH_SHORT).show() })
{
    Text(text="Show Message")
}
```

Set button text

Toast Message

Length to display toast

Note: A toast is a small message that gets displayed on screen

Button With Event Handler
